

Visualization Analyst – S2 Statistical Solutions is a growing statistical analysis company based in Cincinnati OH. Our core business is in data mining and economic analysis of medical device, diagnostic and pharmaceutical companies. Our work has premiered in numerous peer reviewed journals and many of our clients are Fortune 500 companies in the medical industry. We offer both 401K and health benefits.

We are looking for a talented and dedicated visualization analyst to work in our Cincinnati offices that is capable of completing and overseeing a variety of professional assignments involving the processing and display of data from a variety of sources. The ideal candidate will have a high level of understanding in database structure and have a creative approach to visualizing data.

Required:

- Bachelor's Degree in Mathematics, Finance, Computer Science or related field
- Experience with Tableau software
- Knowledge of ETL processes and related software tools
- Knowledge of databases, warehouses, business intelligence systems and data analysis tools
- Proven analytic skills: ability to quickly and accurately analyze data
- Demonstrated problem solving and judgment capabilities
- Demonstrated ability to operate in a team environment
- Good verbal and written communication skills, including ability to summarize and present complex data with clarity
- Proficient in Microsoft Office
- Strong teamwork and interpersonal skills
- Able to work within project budgets and complete deliverables in a timely manner.

Essential Functions:

- Perform ETL – Extract, Transform and Load – on complex data sets
- Prepare reports, tables, charts and graphs using Tableau software.
- Communicate results within the organization and also with clients
- Follow applicable SOPs and maintain appropriate project documentation.
- Perform, track, and manage related project work as assigned.
